Claim 14 has been cancelled.

Claim 15, "claim 14" has been replaced with –claim1—

Claim 16, line 11, "flow." has been replaced with –flow, wherein the traffic flow criteria specifies an appropriate action that is performed on the network packet.—

The following is an examiner’s statement of reasons for allowance: the prior art does not teach or fairly suggest a method for distributing traffic flow criteria between network devices, the method comprising: defining a flow specification data type for a routing protocol, wherein the flow specification data type allows a variable number of packet flow attributes to be specified for a packet flow through a network; generating, with a first routing device, a message that encodes routing topology information, wherein the routing topology information defines at least one route between a first network device and a second network device, and traffic flow criteria specifying the packet flow in accordance with the flow specification data type; and communicating, with the first routing device, the message to a second routing device to direct the second routing device to control network traffic based on the traffic flow criteria: wherein the

traffic flow criteria comprises source information that identifies a source network device of the packet flow, as recited in independent claims 1, 16, 32, 39, 46, 55 and 63..
